

# MANAGING SAFELY STOP PRESS!

There are limited places left on our IOSH Managing Safely Course beginning on 12<sup>th</sup> September. Call NOW to book your place on 01274 465586 and ask for Jaki

Every year in the UK there are over 2 million work related accidents. Many of these kill people, a number result in employees being severely injured resulting in time off work and a great many more result in losses to the organisation as a result of down time, staff replacement costs or the time involved in investigating accidents to prevent similar occurrences.

A large number of claims can be prevented by ensuring that senior staff have received suitable and sufficient health and safety training.

T L Dallas Risk Management can provide this training for you. We are running an IOSH Accredited Managing Safely course starting 12<sup>th</sup> September for 4½ days at our office in Bradford with LIMITED SPACE AVAILABLE. All refreshments and course materials are included in the price.

This course is aimed to “ensure that safety requirements are appreciated by people employed as line managers and enable them to review their own departmental systems for safety, introducing new controls or implementing changes as appropriate to make their workplace safer”.

## Who Should Attend?

Managing Safely is for managers and supervisors in any sector, and any organisation. It's designed to get managers up to speed on the practical actions they need to take to handle health and safety in their teams.

## Course Content

- Introduction and overview
- Risk assessment
- Controlling risks
- Health and safety law and understanding your responsibilities
- Identifying hazards
- Investigating accidents and incidents
- Measuring performance
- Protecting our environment

## Learning Outcomes

After successfully completing the course the manager will be better able to:

- Apply management principles and practices to safety and health issues as part of a management strategy.
- Set achievable safety and health objectives and plan and implement courses of action to achieve those objectives.
- Recognise safety and health hazards present in the workplace.
- Carry out and record assessments of the risks associated with workplace hazards, and recommend suitable control measures.
- Ensure that adequate information, training and supervision are provided for employees.
- Investigate an accident or incident involving injury or damage to determine the causes and take appropriate actions.
